DECEMBER 2018

**IFLA WISHES YOU  
JOYOUS HOLIDAYS AND  
A 2019 FULL OF  
PROSPERITY,  
LANDSCAPES AND  
SUCCESS!**

**21**

---

Design has the ability to achieve change in the world - it is not just about doing a project, it is how the project can effect change and what the broader potential of a

opportunities and the expanding role of the landscape as an organising force, landscape architects are rethinking and challenging the way we build human environments.

Landscape architecture is entering a period of increasing relevance and importance globally as advocates of climate change, health and wellness, community empowerment, food security and recognition of indigenous cultures. These are some of the key messages that define the practice of landscape architecture and its contribution to society. No other profession is able to have this kind of influence and authority and landscape architects have a unique opportunity in leading this agenda. By incorporating natural systems, infrastructure opportunities and expanding the role of the landscape as an organizing force, landscape architects are rethinking and challenging the way we build and manage our environments.

As we look back on 2018, we see a stronger and rapidly expanding profession globally. By sharing our ideas globally and through collaboration, 2019 will see us continue to expand as a profession and increase our influence and effectiveness to the betterment of all.

**JAMES HAYTER**  
IFLA President
